

Latest News & Insights

The May contract expired mildly higher on Tuesday to settle at \$2.559. June took over and traded lower to start but rallied a bit as the week went on to close out Friday at \$2.78, a gain over 3.6%. The summer was up 2.7% and the one- and two-year strips were up 1.6% and 1%, respectively.

The market has been largely trading sideways on mixed fundamentals. The EIA posted an injection of 79 Bcf, generally in line with expectations, but inventories are ahead of both the one- and five-year averages. Both LNG exports and production are off their highs, but that's largely due to seasonal maintenance. The weather has generally been a bit bearish but warmer temperatures are blanketing the West in upcoming forecasts. Crude topped the \$100 mark again as tensions continue in the Middle East. Please reach out with any questions.
